

It has come to my attention that the FCC is considering replacing KLOVE radio with a Low Power FM station in some areas. I listen to KLOVE on a FM translator that could be effected by this decision. I respectfully request that you deside against this action. KLOVE is the only Christian based station in many areas.

I started listening to KLOVE, 5 years ago when my youngest child was born. All the other stations played music that was not good for my infant daughter to be exposed to. My daughter is now 5 years old and this is the only station she listens to-it is truly good for the whole family and even my teenage children listen to it (with no arguing).

I think the loss of KLOVE, if it is displaced by a LPFM, would be felt through-out the community. There is so much bad music on the radio now that losing this station would mean I would just have to turn off the car radio and listen to tapes- All the songs on KLOVE are positive and encouraging, unlike the songs that can be heard all up and down the dial at any given time.

Please don't take KLOVE away from any community it is just too valuable to all that listen to it.

Sincerely,
Danielle Faircloth
